Dated : 25.10.2018

CORRIGENDUM

Sub : Amendment in the brief purpose and Function of Sphere Spectroradiometer System (2.0m)– reg.

Please refer to our invitation for Pre-Indent Conference (PIC) along with detailed scope of PIC, which was uploaded on NPL's Official website on 12.10.2018 to finalize the broad technical specification of Sphere Spectroradiometer System (2.0m)

In regard to above, following amendment in the brief purpose and function of Sphere Spectroradiometer System (2.0m) has been carried out and it may kindly be read exactly as follows :

“Measurement of photometric parameters is an important part of LED calibration and test. The Sphere Spectroradiometer System based spectral light measurement unit is capable of measuring various photometric parameters like Total luminous flux, Correlated Color Temperature (CCT), Color Rendering Index (CRI), Color coordinates, as per BIS and IESNA recommendations. The said system will be capable of carrying out photometric measurements on variety of luminaires like LED Bulb, Street Light, Tubular Light, Lantern, Array, Packages, Down Lighting, LED Architectural lighting, etc. The system would be in compliance with national (IS-16106:2012) and international standard (IES-LM-79-08, IES-LM-82-12) and provide an unbreakable chain of traceability for photometric parameters”.

The date, time & venue of the said Pre-Indent Conference will remain the same. The copy of said Corrigendum is also available on our website <http://www.nplindia.org> [under link of "Tenders/Pre-Indent" → "Tender Notification"].
